Il nostro catalogo è studiato per soddisfare innanzitutto la richiesta del consumatore, che chiede sempre più contenitori in carta, materiale riciclabile al 100%, senza rinunciare alla visibilità del prodotto. L'utilizzo della plastica viene adottato solo laddove sia necessario proteggere il prodotto, come nel caso dei coperchi in rPet (materiale riciclato e riciclabile). Inoltre i prodotti sono stati studiati per semplificare il lavoro di confezionamento nei centri di imballaggio dei prodotti ortofrutticoli. I prodotti FoodBags vengono realizzati esclusivamente con materiali certificati che garantiscono una lunga durata della shelf life del prodotto. Sono inoltre riciclabili, idonei al contatto con gli alimenti e adatti allo stazionamento nelle celle frigo. I modelli disponibili sono molteplici e di qualsiasi formato; queste confezioni, prodotte con grafica generica o neutre, possono essere personalizzate con il proprio brand.

Our catalog has been developed firstly to satisfy the consumers' demand, that prefers 100% recyclable paper containers without renouncing the visibility of the product. The use of plastic is adopted only where it is necessary to protect the product, as in the case of rPet lids (recycled and recyclable material). In addition, the products have been designed to simplify the work of packing in fruit and vegetable packaging centers. FoodBags products are made exclusively with certified materials in order to guarantee a long shelf life of the product. They are also recyclable, suitable for contact with food and suitable for cold room. The models available are many and of any size; these packs, produced with generic or neutral graphics, can be customized with your own brand.
